SUMMARY

Systems-focused Software Engineer specializing in **backend infrastructure**, **clean architecture**, and **distributed microservices**. Pragmatic problem solver with strong CS fundamentals (**concurrency**, **system design**, **data structures**), dedicated to rapid execution and building **production-grade**, **highly scalable software systems**.

EDUCATION

MBS College of Engineering & Technology <i>Bachelor of Technology (B.Tech) in Computer Science 8.2/10.0</i>	Jammu, JK 2023 – 2027
Little Flower Higher Secondary School <i>Higher Secondary 83%</i>	Jammu, JK 2020 – 2022
St. Paul's Convent High School <i>Secondary School 82%</i>	Jammu, JK 2006 – 2020

TECHNICAL SKILLS

Languages & Core: Java, TypeScript, JavaScript, C/C++, Python, SQL, Bash, System Design, Data Structures
Backend & Cloud: Spring Boot, Node.js, Microservices, AWS (EC2, S3, SQS), Docker, Kubernetes, CI/CD
Databases & Tools: PostgreSQL, Turso DB, MySQL, Redis, Prometheus, Grafana, Loki, n8n, FFmpeg
Frontend & Mobile: Next.js, React.js, Tailwind CSS, Three.js, Android, React Native, Flutter, Dart
AI & Machine Learning: LLMs, RAG, Hugging Face, Model Fine-Tuning, Groq, Mistral AI

EXPERIENCE

A2B Digital Solutions <i>Software Engineer Intern</i> - Constructed an enterprise admin system handling complex workflows across admins, customers, and vendors. - Developed production-grade microservices using Spring Boot, Hibernate, and PostgreSQL with Flyway. - Optimized PDF generation via OpenHtmlToPdf (>80% reduction); implemented an AI-native front-end workflow, significantly accelerating development and reducing design costs by 90%.	Remote May 2026 – Jul 2026
Sashel <i>Software Engineer Intern</i> - Collaborated on core AWS architecture and designed a massive relational database schema from scratch. - Deployed 4 production microservices and launched 7 automation systems utilizing n8n. - Integrated Shiprocket for deliveries and Razorpay for 14-day payment escrows with automatic refunds.	Remote Jul 2025 – Oct 2025
CodeVeda Tech. <i>Technical Writer</i> Authored a 240-page Spring Boot curriculum (REST APIs, Redis, AWS) and a GenAI curriculum (LLMs).	Remote Nov 2025 – Dec 2025
Polarions <i>Automation Engineer</i> Devised a social media distribution system orchestrating n8n, Meta API, and Cloudflare Workers.	Sweden (Remote) Oct 2025 – Nov 2025

PROJECTS

100xsystems 100xsystems.dev github.com/100xsystems - Architected an EdTech platform for 100+ developers, synthesizing 25 years of engineering resources. - Programmed scalable CLI tools, React CMS solutions, and generated dynamic content feeds. - Formulated comprehensive test suites using Vitest and JUnit5 to reliably support at-scale technical education.	Feb 2026 – Present
JU Learning julearning.com github.com/julearning - Architected a zero-cost platform serving 1,400+ resources to 500+ students utilizing static JSON files. - Established a GitHub CI/CD contribution pipeline enabling systematized PR generation and decentralized reporting.	May 2025 – Present
Rose Social Media rose-six-neon.vercel.app - Created a decentralized web client featuring an Instagram-inspired UI, multi-feed streams, and native filtering. - Incorporated the AT Protocol to securely handle lexicons; interfaced with PDS and relays to manage state.	Jul 2026 – Aug 2026
StartX startx-zeta.vercel.app - Developed an AI validation platform routing across multiple LLM providers using a low-latency Turso DB. - Integrated Instamojo payments and implemented dynamic visual diagramming using Mermaid.js and GSAP.	Apr 2026 – May 2026
DSA-IN-3D github.com/aryanbatras/DSA-IN-3D - Constructed a multithreaded 3D ray tracing engine from scratch in pure Java (3,500+ LOC) in 2 weeks. - Designed a builder API for 12+ algorithmic visualizations; configured FFmpeg for .mp4 generation.	Aug 2024 – Sep 2024

PROFILES, CERTIFICATIONS & LEADERSHIP

Coding Profiles: GitHub: **2,152 Contributions**, 93 Repos (github.com/aryanbatras) | LeetCode: **Top 60%**, 1454 Rating
Certifications & Achievements: DevOps for Beginners (*Udemy - 2025*) | Author, "The Book of Rose" (*Jun 2024*)
Leadership: Peer Mentor, College Coding Club (*Mentored a 50+ member technical community - 2023*)
